<b>Junior to Senior Java developer</b> <i>T-Systems RUS</i> <ul style="list-style-type: none"><li>• Develop and support of legacy full-stack application written on JavaEE with Struts as the frontend and Oracle-DB</li><li>• Develop and support of legacy Windows thick-client written on JavaScript and C#</li></ul>	February 2016 – February 2019 <i>Saint Petersburg, Russia</i>

## TECHNICAL SKILLS

---

**Languages:** Java, SQL (PL/SQL, Postgres), JavaScript, HTML/CSS, C++, C  
**Frameworks:** Spring Boot, Apache Camel, Flyway, Liquibase, JUnit, Testcontainers, OpenAPI, ReactJS  
**Tools:** Jira, YouTrack, GitLab, TeamCity, Jenkins, IntelliJ, Docker, Rancher, Kafka, IMB MQ

## SOFT SKILLS

---

**Methodologies:** Agile, Scrum, SAFe, Waterfall

**Characterization:** INTP(-A), critical thinking, passion for improvement

**HR:** hiring, mentoring, leadership, firing

## ACHIEVEMENTS AND CERTIFICATES

---

**Member of AsyncAPI Technical Steering Committee**

**Certified SAFe PO**

## FREE TIME PROJECTS

---

**AsyncAPI Java generator** | *Java, Spring Boot, JavaScript*

April 2020 – Present

- Developed a module for a AsyncAPI code generator to create Spring Boot based code template like it does in OpenAPI
- Several async protocols were supported: kafka, mqtt, amqp
- Also several adjustments in central generator code

**Traffic light** | *Java, Gradle, Docker*

July 2019 – August 2019

- Developed a three microservices, first with DB and CRUD REST API to store "news", second is frontend app to display the "news" and status of build from Jenkins as a Traffic light, third is frontend app to create "news"
- All services has a build pipeline to create Docker images
