TECHNICAL SKILLS

Languages: Java, SQL (PL/SQL, Postgres), Kotlin, JavaScript, HTML/CSS, C++, C

Frameworks: Spring Boot, Spring Framework, Apache Camel, Apache Kafka, Gradle, Flyway, Liquibase, JUnit, Testcontainers, Docker, Rancher, OpenAPI

Tools: PostgreSQL, GitLab CI, TeamCity, Jenkins, ElasticSearch, Prometheus, Grafana, Apache NiFi, Jira, YouTrack

SOFT SKILLS

Methodologies: Agile, Scrum, SAFe, Waterfall

Characterization: INTP(-A), critical thinking, passion for improvement

HR: hiring, mentoring, leadership, firing

ACHIEVEMENTS AND CERTIFICATES

Member of AsyncAPI Technical Steering Committee

Certified SAFe PO

FREE TIME PROJECTS

AsyncAPI Java generator | *Java, Spring Boot, JavaScript*

April 2020 – Present

- Developed a module for a AsyncAPI code generator to create Spring Boot based code template like it does in OpenAPI
- Several async protocols were supported: kafka, mqtt, amqp
- Also several adjustments in central generator code

Traffic light | *Java, Gradle, Docker*

July 2019 – August 2019

- Developed a three microservices, first with DB and CRUD REST API to store "news", second is frontend app to display the "news" and status of build from Jenkins as a Traffic light, third is frontend app to create "news"
- All services has a build pipeline to create Docker images
